Fine stalls for fine horses

Light-weight, durable  
aluminum  
**Box Stalls**

## Light-weight, Durable Aluminum **Box Stalls**

Fine stalls for fine horses...

Eberstal Box Stalls are fabricated using high-quality diamond bar technology, ensuring rugged durability while keeping stalls lightweight for ease of use and handling. Frames are 1½" square aluminum tubing, with a .125" wall.

Our box stalls are available with your choice of wood board or puck board bottoms, with totally enclosed side panels available, and optional, double-swing feed doors. Standard panels are 7' high by 10' or 12' wide, and pin together for easy setup.

Spring-loaded latch pin on doors ensures quick-latch action for secure closure.

### Dealers Wanted

Left-Right: Wood board bottom > Diamond Bar Technology  
Spring-loaded quick-latch pins > Optional Puckboard Construction
